## PROJECTS

**ATM Transactions System Using Java, JDBC, and MySQL** **May 2024 - May 2024**

Developed a Java-based ATM Transactions System leveraging JDBC for seamless integration with MySQL database. The system offers secure user authentication against stored credentials, enabling functionalities like balance inquiry, cash withdrawals, deposits, transaction history viewing, and password management. Users can perform banking operations with ease through a user-friendly interface. Implemented robust security measures to safeguard sensitive information and ensure data integrity. This project showcases proficiency in Java programming, database connectivity using JDBC, and practical application of Object-Oriented Programming principles.

**Developed an eCommerce Website** **Sep 2023 - Oct 2023**

Implemented client-side routing for a smooth and dynamic user interface. Categorized products for easy navigation and utilized Redux state to manage product data efficiently. Integrated a shopping cart feature, allowing users to add, modify, and remove items effortlessly. Designed and implemented a secure checkout process for a streamlined shopping experience. Technologies Used: React.js, Bootstrap, HTML, CSS, JavaScript, Redux Toolkit(For state Management).

## LANGUAGES

English | Telugu | Hindi

## EXTRA SKILL

## ACHIEVEMENTS

Awards # Inspire Award (Science Fair Award) Project : Accident Prevention Road Safety Project Sep 2015

## TRAINING/CERTIFICATIONS

Certification in the Basics of Python
